

## Government Fleet Managers are Planning Ahead

- Fleet Portfolio — are Alternative Fuel Vehicles in your emergency planning efforts?
- What if your fuel supply is reduced by 50%?
- Does your agency have a priority system for vehicle use during a fuel shortage?
- Does your organization's emergency plan have an emergency annex?

## Energy Planning Consultants has the Experience & Expertise

## FUEL MANAGEMENT PLANNING

**EPC**

*Talk to the Planning Experts*

# FUEL MANAGEMENT PLANNING

# Energy Planning Consultants

## What will cause your next energy emergency?

### Severe Weather? Equipment Failure? Natural or Man-Made Disasters?

The energy situation is actually quite dynamic – changes and decisions occur every day that affect our nation and the entire world energy supply-and-demand picture.

Disasters such as hurricanes, tornadoes, floods, and local thunder storms can cause long-term power outages and cause interruptions of fuel supplies and distribution equipment.

## Energy Planning Consultants – Experienced and Trained

EPC's program enables effective and efficient fuel management plans in times of emergencies and non-emergencies. For each client, EPC maintains a secure web-based Fuel

Management Portal. Users are provided with all energy planning information in hard and electronic documents. Plans include purchasing alternatives to save money and ensure supplies. Alternatives are checked to make sure distribution of fuels are reliable and in

good working order in case of emergencies. Conservation tips are offered to save money and energy usage.

EPC research shows few gas stations nationwide have emergency power generators. We can work with your energy office, the DOE, and owners of strategically located local fueling stations to implement emergency generators for fuel pumping during electrical outage.

### EPC SERVICES

- Web-Enabled Energy Assurance Planning for Local, City, and State Governments
- Fuel Management Plans
- Critical Facility & Key Resources Risk and Vulnerability Audits
- Cyber Risk Analysis
- Alternative/Dual Fuel Distribution Energy Solutions
- EOC-ESF-12 Energy Emergency Management Support
- Emergency Fueling Equipment

### EPC STAFF

#### Robert “Bob” Kistner, *President and CEO*

Bob has over 20 years experience with the U.S. Army Corp of Engineers and 10 years with FEMA responding to over 30 disasters. Over the last 11 years he has developed energy assurance and fuel management plans for cities and states.
